EXPERIENCE

FEBRUARY 2026 – CURRENTLY

SENIOR SUPPORT & MAINTENANCE ENGINEER AT RODELA TECHHOUSE LIMITED

I currently serve as a Senior Support & Maintenance Engineer at Rodela Techhouse, while also continuing in my capacity as a Frontend Software Engineer and UI/UX Designer. In this combined role I act as the operational bridge between clients/users and the engineering team, keeping production systems stable, secure, and available by managing support operations, responding to incidents, and driving preventive improvements across client SLAs and internal SLOs. I simultaneously contribute to frontend development and UI/UX design across ongoing products, leveraging my experience with React, Next.js, Angular, Flutter/Dart, and Figma. I work closely with the engineering, product, and delivery teams, as well as hosting and cloud providers.

Roles:

- Incident triage and ticket management: receiving, categorizing (incident/service request/problem), prioritizing, and routing tickets by severity while maintaining SLA compliance and clear resolution notes.
- Monitoring application health across dashboards, alerts, and logs using tools such as Grafana and Sentry, and responding promptly to production incidents.
- Troubleshooting issues across the full stack (frontend, backend, database, and configuration); applying fixes directly or coordinating with backend developers, and managing client communications during incidents.
- Leading and participating in Root Cause Analysis (RCA) for major incidents; documenting findings, preventive actions, and maintaining a Known Error Database (KEDB) and runbooks.
- Applying routine preventive maintenance including dependency upgrades, OS and container updates, security patches, and configuration hygiene; verifying backup jobs and scheduled tasks.
- Supporting deployments with checklists and post-deployment verification; maintaining environment consistency across dev, test, staging, and production.
- Assisting in UAT coordination and release validation for client projects and internal products.
- Maintaining access control discipline and ensuring secure handling of secrets and credentials in line with least-privilege principles.
- Identifying recurring issues and recommending engineering improvements including enhanced logging, monitoring, tests, and guardrails.
- Using Docker, CI/CD pipelines, Linux, Git, SQL tools, Jira, and Postman in day-to-day support and maintenance operations.

FEBRUARY 2025 – JANUARY 2026

FRONTEND SOFTWARE ENGINEER AT RODELA TECHHOUSE LIMITED

I worked for Rodela Techhouse, a startup under Sentinel Africa, as a mid-level frontend software engineer and UI/UX designer. The technologies I used include Dart, Flutter, JavaScript, TypeScript, ReactJs, NextJs, TailwindCSS, Angular, RxJS and Shadcn. Products I worked on include a Performance Scorecard System for Golis Telecommunications, a proctoring exam system for Sentinel Africa and Certi-Trust, a welfare mobile application and website used by Sentinel Africa, an Enterprise Risk Management system for various organisations, a Groupe Spéciale Mobile Association (GSMA) compliance audit tool built for Certi-Trust, serving Mobile Money Providers, Scheme Assessors and external auditors, and an in-house Information Security Management System guided by the ISO 27001 standard policies, to be used by various NITAs in Uganda and Kenya. Since most of the systems built are for ISO/IEC 27001 certified companies, Sentinel provided training on the ISO/IEC 27001 Lead Auditor Certification to allow familiarity during the development process.

Roles:

- Development of a system process flow and logic, before development of software systems.
- Wireframing and prototyping of systems before development.
- Development of a Minimal Viable Product before product release into the market.
- Research and analysis of a product before the building phase.
- Designing of system prototypes using Figma before development, to ensure a clean User Interface (UI) and User Experience (UX) process.

- Implemented accessibility (WCAG / A11y) while developing products at Rodela, ensuring familiarity with WCAG 2.1 accessibility guidelines, semantic HTML, ARIA roles, and responsive design testing.
- Work in Agile sprints with designers, product owners, and backend teams, using Git, Zoho and Jira for version control and collaboration.
- Testing of API endpoints developed by the backend engineers, in the POSTMAN test environment before implementation.
- Contributed reusable UI components and design documentation to internal design systems.
- Development of mobile applications using Flutter and Dart.
- Implementation of system state-management using Bloc and Riverpod, in mobile applications developed in Flutter and Dart.
- Development of professional websites using Angular, RxJS, ReactJS, NextJS, TailwindCSS, JavaScript and TypeScript.
- Development of Progressive Web Applications for all the relevant websites.
- Implementation of system state-management using Redux and Zustand.
- Writing unit and end to end testing using Cypress, Jest and Playwright. Implemented Jest unit tests for React components and integrated Cypress E2E test workflows for critical user journeys.
- Performance Optimization: Optimized React/NextJS apps using lazy loading, code-splitting, Lighthouse audits, and performance profiling.
- Presentation of Minimal Viable Products to current clients and potential ones.
- Development of the ISO/IEC 27001 Information Security Management System (ISMS), an automated platform that tracks and manages a company's ISMS compliance. The system was deployed for Sentinel Africa — onboarding clients including Rwanda Civil Aviation Authority (RCAA) and Kenya College of Accountancy (KCA) — and for NITA Uganda's MDAS. OpenAI was leveraged within the ISMS to automate compliance analysis and reporting tasks.
- Integration of OpenAI within the Enterprise Risk Management (ERM) system to assist with risk analysis, risk treatment recommendations, and automated reporting for enterprise clients.

Projects:

Cerebro Proctoring Examination System:

<https://cerebro.rodela.co.ke/>

Certi-Trust Exam Proctoring System:

<https://exam.certi-trust.co.ke/>

Sentinel Africa Welfare Website System.

Sentinel Africa Welfare Mobile Application.

Golis Performance Scorecard.

Enterprise Risk Management System (with OpenAI integration):

<https://demo.risk.rodela.co.ke/>

GSMA Mobile Money Compliance Audit Tool (Certi-Trust):

<https://gsma.rodela.co.ke/>

A compliance audit platform built for Certi-Trust, serving Mobile Money Providers, Scheme Assessors, and external auditors.

ISO/IEC 27001 Information Security Management System (ISMS) (with OpenAI integration):

Automated ISMS platform aligned to ISO 27001 policies. Deployed for Sentinel Africa — onboarding clients including Rwanda Civil Aviation Authority (RCAA) and Kenya College of Accountancy (KCA) — and for NITA Uganda's MDAS. OpenAI is leveraged for compliance analysis and automated reporting.

MAY 2021 – CURRENTLY

FREELANCE FULL STACK DEVELOPER

I have been working as a freelance Full Stack developer specializing in JavaScript, TypeScript, ReactJS, NodeJS, GraphQL, Tailwind CSS, ExpressJS, React Native, MySQL and Redux. My proficiency in Flutter and Dart is also exceptional and I have worked on a few projects using the framework. However, I am currently focusing on the MERN stack. Some of the projects I

have worked on include Msafiri tourism mobile application, Bingeflix movie application, a ReactJS ChatGPT clone and an E-commerce website developed using the MERN stack. Most of my projects and contributions are found on my GitHub account, except for pre-signed non-disclosure Agreement projects. I also have experience in using git version control, GitHub, Zoho and Jira.

Roles:

- Designing of systems before development using Figma.
- Development of the website's frontend using ReactJS, JavaScript, Tailwind CSS and Material UI.
- Development of website's backend using NodeJS.
- Implementation of state management using Redux library.
- Development of Android applications using Flutter framework.
- Running program testing using React Jest Testing.
- Development of backend using Firebase.
- Integration of APIs in various projects at the same time implementing tests, to ensure efficiency.
- Documenting, storing and managing API specifications using Postman.

AUGUST 2023 – JANUARY 2025

COMPLIANCE OFFICER AT AFRICA GLOBAL LOGISTICS MUGOYA

I worked at Africa Global Logistics as a Compliance Officer under Platinum Outsourcing Limited.

Roles:

- Dispatching of products using the Speed System, a Warehouse management system, as per the delivery alerts.
- Drafting of monthly site traffic analysis of all transport vehicles, using Power BI.
- Ensuring the accuracy of all dispatched products during staging and loading as per the earlier sent stock transport orders.
- Keep track records of received, damaged and dispatched products. At the same time ensuring access control.
- Site product risk management by preventing pilferage and theft, which can be solved by access control.
- CCTV monitoring, network configuration maintenance and IT support.

JULY 2023 – NOVEMBER 2023

ANDELA REACT PROGRAM APPRENTICESHIP

I was selected for the React learning program sponsored by Andela, Pluralsight and Meta. The main goal of the program is to help future and current software developers master the React framework. Learning materials are provided through Pluralsight, and individuals are paired in different groups to share knowledge and work on different projects.

Roles:

- Building of systems using ReactJs and TypeScript.
- Pre-design of user interfaces before MVP development, using Figma.
- Ensuring application state management using Redux library.
- Use Tailwind CSS to set up modern Website styling.
- Development of modern websites using Material UI.
- Development of Backend using NodeJS.

NOVEMBER 2022 – AUGUST 2023

COMPLIANCE CLERK AT AFRICA GLOBAL LOGISTICS HEADQUARTERS KENYA

I worked at Bollore Logistics Headquarters Embakasi, under Platinum Outsourcing and Logistics Limited. Bollore Logistics was later rebranded as Africa Global Logistics after acquisition by the Mediterranean Shipping Company.

Roles:

- Dispatching of products using the Speed System as per the delivery alerts.
- Issuing of Kenya Revenue Authority UDV products stickers and keeping track of their daily usage data.
- Drafting of monthly site traffic analysis of all transport vehicles, using Power BI.
- Ensuring the accuracy of all dispatched products during staging and loading as per the earlier sent stock transport orders.
- Keep track records of received, damaged and dispatched UDV imports, to ensure accuracy and transparency of product movement.

SEPTEMBER 2021 – NOVEMBER 2022

COMPLIANCE CLERK AT EAST AFRICA BREWERIES LIMITED KENYA

I worked as a compliance clerk under Platinum Outsourcing and Logistics Limited at East Africa Breweries Limited. My duties included support of operations in ensuring risk management and prevention. Conducting of spot-check on beer and UDV products to ensure dispatch accuracy and addressing variance cases reported, as per the dispatch documentation. Confirming of staged products in the warehouse as per load-audit.

Roles:

- Confirming of staged products using the load audit records and dispatch using the System Applications and Products System.
- Conducting of products spot-check with reference to the load audit and tax invoice.
- Ensure adhering to Standard Operations Procedures by all employees in the site.
- Ensure accuracy while receiving of all UDV imports products.
- RF Gun maintenance and scanning of OLPN and ILPN products respectively.

MAY – SEPTEMBER 2021

WOLFE DIGITAL SOLUTIONS – FLUTTER SOFTWARE DEVELOPER

I worked at Wolfe Digital Solutions as an android developer, using the Flutter framework. While there I oversaw the development of user interfaces, implementation of mobile application products and design.

Roles:

- Android development using the Flutter Software Development Kit.
- Frontend Software Development.
- Firebase backend system setup and maintenance.
- User Interface design.
- Ensure smooth deployment of client applications.
- Fetching of various data using APIs and displaying them.
- Implementation of Bloc state management.

JANUARY TO APRIL 2020

IT INTERN/TRAINEE, IMAGE OFFICE SUPPLIES PARKLANDS

Worked as an IT department trainee, at Image Office Supplies main office in Parklands. While there I sharpened my skills in network administration, software maintenance, biometric systems, and CCTV installation. I joined them while they were working on a contract at Avenue Hospital Thika, this greatly increased my teamwork and technical skills.

Roles:

- CCTV setup and maintenance.
- DVR and NVR setup.
- Setup of network cables.
- IT support.
- Handset phones configuration and setup.
- Cable management.

JANUARY TO APRIL 2019

IT ATTACHEE AT DEDAN KIMATHI UNIVERSITY OF TECHNOLOGY

Took part in an IT department internal attachment, at Dedan Kimathi University of Technology. During this period, I improved my networking, computer hardware maintenance and software development.

PROJECTS

Bingeflix:

Bingeflix is a Netflix clone website built using React JS, JavaScript, HTML5 and Tailwind CSS. The website also uses the TMDB API to fetch the necessary data used in the site. The site is dynamic whereby you can see the displayed movies and search for new ones.

Link to project:

<https://github.com/frankmutethia/bingeflix>

React ChatGPT-Clone:

This is a ChatGPT clone made using ReactJS, ExpressJS server with socket.io and Tailwind CSS. The OpenAI API is also implemented to fetch the response data, that is displayed after a certain enquiry or data input in the chat.

Link to project:

<https://github.com/frankmutethia/react-chatgpt-clone>

Msafiri Application:

Msafiri is a tourism application built using Flutter, Dart and Firebase. The application allows users to search for tourism packages within their budget and make bookings. The application also allows various organizations to post the travel packages they offer and allow people to pick what they prefer.

Link to project:

<https://github.com/frankmutethia/msafiri1>

Task Pal:

Task Pal is a web application built using React JS, JavaScript, HTML5 and Tailwind CSS. The website allows individuals to organize their daily activities and maintain maximum productivity.

Link to project:

<https://github.com/frankmutethia/task-pal>

ISO/IEC 27001 Information Security Management System (ISMS):

An automated ISMS platform that tracks and manages a company's ISO 27001 compliance. Built for Sentinel Africa, which onboarded clients including Rwanda Civil Aviation Authority (RCAA) and Kenya College of Accountancy (KCA), and deployed for NITA Uganda's MDAS. OpenAI is leveraged within the system for compliance analysis and automated reporting tasks.

Live project – Sentinel Africa:

<https://isms.rodela.tech.com/>

Live project – NITA Uganda:

<https://isms.nita.rodela.co.ke/>

Enterprise Risk Management (ERM) System:

An enterprise risk management tool that enables organizations to identify, assess, treat, and monitor risks across their operations. OpenAI is integrated to assist with risk analysis, treatment recommendations, and automated reporting.

Live project:

<https://demo.risk.rodela.co.ke/>

Certi-Trust Exam Proctoring System:

An online exam proctoring platform developed for Certi-Trust, enabling secure, remotely invigilated examinations with anti-cheating mechanisms and live monitoring.

Live project:

<https://exam.certi-trust.co.ke/>

GSMA Mobile Money Compliance Audit Tool (Certi-Trust):

A multi-role compliance audit platform built for Certi-Trust, serving Mobile Money Providers, Scheme Assessors, and external auditors, built to GSMA standards.

Live project:

<https://gsma.rodela.co.ke/>

EDUCATION

JUNE 2017 TO MAY 2021 – UNDERGRADUATE DEGREE

BSC. IN INFORMATION TECHNOLOGY, DEDAN KIMATHI UNIVERSITY OF TECHNOLOGY

Joined the institution with the passion to pursue Information Technology. Graduated in May 2021, with a Second-Class Honors Lower Division.

INTERNATIONAL COMPUTER DRIVING LICENSE CERTIFICATION (ICDL)

Zetech University

Award: International Computer Driving License Certification

KENYA CERTIFICATE OF SECONDARY EDUCATION

UTUMISHI ACADEMY

Award Grade: B

KENYA CERTIFICATE OF PRIMARY EDUCATION

KATHIGIRI MIXED PRIMARY SCHOOL

Award Grade: B

CERTIFICATIONS

PECB ISO/IEC 27001 Lead Auditor Certification

Completed training and certification as an ISO/IEC 27001 Lead Auditor, provided by Sentinel Africa in partnership with PECB. This certification covers the principles and practice of information security management systems (ISMS), risk assessment, audit planning and execution, and ISO 27001 compliance requirements.

Certified: 2025

Andela React Learning Program

A software engineering program sponsored by Meta, Andela and Pluralsight, whose goal was to equip developers with current ReactJS, Tailwind CSS and NodeJS skills.

Link to Certificate: [Link](#)

CISCO Certified Network Associate (CCNA)

A computer networking program developed by Cisco, that covers network communication, function of application layer services, principles of IPV4 and IPV6, address management, protocols in network communication and lab practical.

Link to Certificate: [Link](#)

Network Administration and Management

An NDG Linux Essential Course offered by Cisco, that covers the understanding of the Linux operating system, the command line, security, and file permission.

Link to Certificate: [Link](#)

WordPress Design Course

A Udemy WordPress Website Design Course that teaches how to create business websites from scratch including online stores and payment gateway integration.

Link to Certificate: [Link](#)

Foundations of User Experience Design

A Google certification course offered by Coursera, that covers understanding of the basic user experience while designing a particular product, the qualities of a UX designer, assistive technology, handling of design sprints and portfolio setup.

Link to Certificate: [Link](#)

Bachelor of Science in Information Technology

BSc. IT from Dedan Kimathi University of Technology.

Link to Certificate: [Link](#)

Certificate of Good Conduct

Link to Certificate: [Link](#)

Kenya Certificate of Secondary School Education

KCSE certificate from Utumishi Academy.

Link to Certificate: [Link](#)

SKILLS

Good communication skills.

PC hardware repairs and maintenance.

Web development: JavaScript, TypeScript, ReactJS, NextJS, Angular, RxJS, Tailwind CSS, ShadCN, CSS3 and HTML5.

Software engineering and system architecture design.

User Interface design using Figma. Wireframing, prototyping and design systems.
Mobile development: Flutter and Dart. State management using Bloc and Riverpod.
State management: Redux, Zustand, Context API.
Backend development using NodeJS, ExpressJS, GraphQL, and Firebase.
Database Management: MySQL, Firebase Firestore, MongoDB. SQL tools.
Testing and QA: Jest (unit testing), Cypress (E2E), Playwright, React Testing Library.
Performance optimization: lazy loading, code splitting, Lighthouse audits, and performance profiling.
Application support and maintenance: incident triage, SLA management, MTTR tracking, Root Cause Analysis (RCA), runbook authoring, and Known Error Database (KEDB).
Monitoring and observability: Grafana, Sentry.
DevOps and infrastructure: Docker, CI/CD pipelines, Linux, Git, GitHub, environment management (dev/test/staging/production), security patching, secrets management.
ISO/IEC 27001 compliance and auditing. ISMS design and implementation. Risk assessment and treatment methodologies. Enterprise Risk Management (ERM) frameworks.
ITIL familiarity: incident, problem, and change management.
Secure system design: RBAC, authentication and authorisation (JWT, OAuth), least-privilege access.
Accessibility standards: WCAG 2.1, ARIA roles, semantic HTML, responsive design.
Progressive Web Application (PWA) development.
Dashboard and data visualization systems. KPI and Balanced Scorecard implementation. Power BI.
LAN cable setup, troubleshooting and maintenance.
Computer Networking: CCNA 1 and 2.
Warehouse Management Systems and Standard Operations Procedures.
WordPress complete buildup.
RF gun analysis on OLPN and ILPN, under SAP and Square Systems.
Risk management in handling UDV imports products.
Project and workflow management: Jira, Zoho, Agile/Scrum, UAT coordination, release management.
